Verbatim™
Technology you can trust

ABOUT VERBATIM

Verbatim is a group company of Mitsubishi Chemical, one of the world's largest chemical companies.

For almost 50 years, the Verbatim brand has been at the forefront of the evolution in data storage technology and remains one of the most recognisable and respected names in the industry. Not only is Verbatim the world's No 1 supplier of optical media (Blu-ray, DVD and CD), it also markets external hard drive storage solutions, SSDs, USB drives, memory cards, and a wide range of related accessories. The company has a strong reputation as a trusted global supplier providing quality products backed up by a fast and reliable service.

Verbatim also has a significant presence in the LED lighting market, where it develops and sells a wide range of LED lamps and luminaires for offices, hotels, restaurants and domestic use. Many of the lighting products have been developed by the Mitsubishi Chemical R&D team, resulting in LEDs with world class thermal management, high colour rendering and low glare. Another Verbatim business category to have benefited from this development expertise is 3D Printing, where Verbatim has recently introduced a range of high quality filaments incorporating unique materials from Mitsubishi Chemical. Further information on these two exciting business categories can be found on www.verbatim.com.

KEY MILESTONES

1969
Verbatim incorporated as Information Terminals Corp. (ITC) - April 28, 1969.

1974
First 8" diskettes produced.

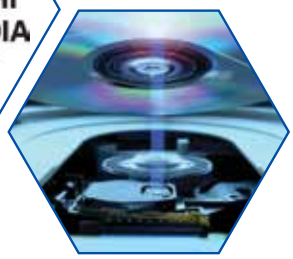
1981
First monthly production of 1 million floppy disks.

1985
Aquired by Eastman Kodak.

A MITSUBISHI KAGAKU MEDIA COMPANY

1990
Mitsubishi Chemical acquired Verbatim and invested in the business.

1993
Introduction of CD-ROM and CD-R disks, CD-R AZO Technology and SRAM cards.



1995
Acquisitions of Laser Technologies and Ecotone. CD-R production started at MCI in Singapore.

1999
Restructuring and establishment of the MKM/ Verbatim Group. DVD-R & DVD-RW launched.

2001
DVD+RW production started (first in the market).

Memory Cards launched.

2002
DVD+R and CD-R Ultra Speed 24x products launched (first in the market).

Start of sales of USB Drives.

2004
Blu-ray BD-R/RE, DVD 16x and DVD+R Double Layer 8.5GB, CD-R 52x LightScribe launched (first in market for all)

2007
Verbatim globalises corporate identity. Aquisition of SmartDisk and launch of External HDD Business.

2008
Blu-ray Dual Layer, SDHC & MicroSDHC, Multimedia HDD, RAID HDD & Colour HDD launched.

2009
Mitsubishi Kagaku Media Co. Ltd announces acquisition of Freecom B.V - extending global presence and position in external storage market.

FREECOM
INNOVATIVE GERMAN QUALITY

2010
Launch of LED Lighting business utilising technology from Mitsubishi Chemical Corp.

2011
VELVE OLED Lighting launched utilising technology from Mitsubishi Chemical Corp.

Cleansui

2012
Cleansui Water Filters launched in Europe.

SSD Launch.

2013
VxRGB LED lamps launched.

VXRGB
LED LIGHTING

2014
Launch of PLA & ABS 3D printing filaments.

M DISC™

2015
M-Disc collaboration. Introduction of 1000yr archival media

2016
Operations centralised to new headquarters in Eschborn, Germany. Optical drives launched

2018
New range of security products launched

THE KAITEKI COMPANY Mitsubishi Chemical Holdings Group

helping people to live in a healthy, comfortable and sustainable way.

OPTICAL TECHNOLOGY

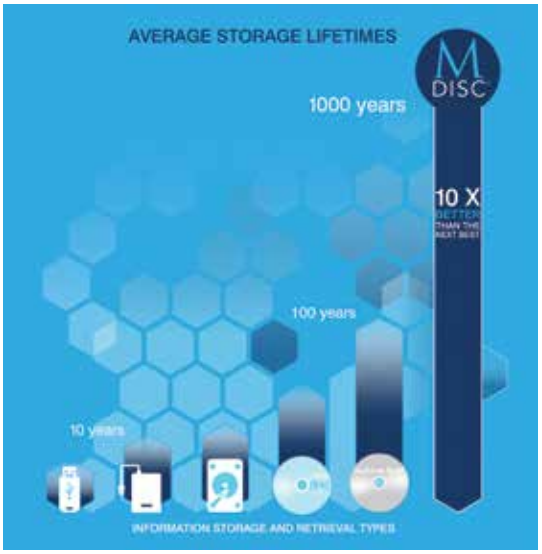
When drive manufacturers test their products, they use Verbatim media. It's the global No.1 for a reason - guaranteed quality!

MDISC™ ARCHIVAL

MDISC FOREVER STORAGE

MDiscs have a projected average lifetime of over 1000 years (based on ISO/IEC 16963 testing) which makes them ideal for storing your most precious documents – files that you simply cannot afford to lose. Unlike traditional optical media which use dyes, data stored on an MDisc is engraved on a patented inorganic write layer which will not fade or deteriorate. This unique engraving process renders these archival grade discs practically impervious to environmental exposure, including light, temperature and humidity.

Losing digital files forever is very easy to do. We all know someone whose laptop or hard drive has failed and has lost everything or faced a big bill to recover their data. The problem is that most types of digital storage are not designed to last beyond five to ten years:



Hard Drives

Are perfect for the day to day storage of lots of digital files. But a large number of mechanical parts mean they have a limited expected lifetime.

USB Drives

Make sharing and moving digital files easy. But they are very easy to lose and most flash chips can only retain data for a maximum of ten years.

The Cloud

Means you can access what you need from any device anywhere in the world. But where is your data, will it always be there and who else can access it?
ONLY optical media is durable enough to protect your most valuable digital files and memories for the long term and Verbatim MDISC is the most durable of all.

See www.verbatim-europe.com/mdisc for more information.

CORE TECHNOLOGIES

Verbatim has always been at the forefront of technological innovation. We are able to maintain our leadership and market the very latest products and technologies due to the extensive research and development that is undertaken by parent company Mitsubishi Chemical Media in Japan.

We pride ourselves on our 'Core Technologies'.

AZO™ — Ultimate resistance to UV light for increased protection and reliability. High quality picture and sound with more than 100 years archival. Used in BD-R LTH type, DVDR and CD-R discs.

SERL™ — A special recording layer present on Verbatim's CD-RW, DVD/RW and BD-RE media that ensure noise-free recording time and time again.

HARD COAT — A specially created tough coating for DVD media and Blu-ray discs that is superbly resistant to harmful scratches.

CRYSTAL — A tough, clear surface layer for increased protection against accidental surface damage.

M•A•B•L™ — Metal Ablative Recording Later. A specially created inorganic recording layer present on Verbatim's BD-R media ensured excellent recording compatibility and prolonged stability for archival life.

Medi Disc — CD-R and DVD-R targeted toward the medical industry for storing valuable patient information. Using tighter specifications for better compatibility and recording quality. Uses AZO.

External Slimline Blu-ray Writer

watch video

- Compact and lightweight external slimline Blu-ray writer
- Includes a FREE 25GB Blu-ray MDISC
- Power provided by the USB port - no need to carry a bulky adapter
- Includes Nero Burn & Archive Software to easily create your own Blu-ray, DVD or CD archives
- Store up to 100GB on a BDXL Disc / 8.5GB on a double layer DVD / 4.7GB on a standard DVD
- Fully compliant with MDISC™ archiving technology.

43890	External Slimline Blu-ray Writer

External Slimline CD/DVD Writer

- Compact and lightweight slimline Mobile DVD Writer
- Ideally suited for use with a notebook or ultrabook
- Power provided by the USB port - no need to carry a bulky adapter
- Includes Nero Burn & Archive Software to easily create your own DVD or CD archives
- Store up to 8.5GB on a double layer DVD / 4.7GB on a standard DVD
- Fully compliant with MDISC™ archiving technology.

CD / DVD Sleeves (Paper)

- Providing a space-saving way to store and protect your Verbatim discs
- Verbatim Paper CD sleeves have a window to view the contents and a flap to prevent the disc falling out

PART NUMBER	DESCRIPTION
49992	CD/DVD Paper Sleeves 50 pack
49976	CD/DVD Paper Sleeves 100 pack

nero Burn&Archive

Verbatim Blu-ray and DVD Writers include Nero Burn & Archive Software:

- CD, DVD, Blu-ray Disc™ burning software for all your videos, photos and precious documents.

- DiscSpan and SmartFit helps you to organise oversized files and archives among many discs - no need to split up files.

- SecurDisc Technology allows password protection to be added for extra security, and an electronic signature so that everyone knows you own the copyright.

- Nero MediaHome Standard brings all your media files together into a single location to help you easily organize and access all your photos, music, and videos. It helps you to burn the right playlist for any occasion; rip or copy your favorite CD; use different filters for the perfect photo; or put together slide shows – including photos, videos, and even film music in the background.

- Burn music videos directly onto audio CDs.

- Convert your audio CDs into the format of your choice - MP3, AAC, FLAC, or APE.

- Various streaming options, including the Nero Streaming Player App, allows you to show your movies, photos, slide shows, and other media files on various devices such as smartphones, tablets and Smart TVs.

- Relevant song titles, band names, and other details are automatically included.

USB DRIVES

With a wide range of award-winning designs and features, Verbatim's selection of USB drives are perfect for storing and sharing data – safely and securely.

ToughMAX USB Drive

watch video

- Made using KyronMAX™ metal replacement material used in fighter jets
- Resistant to:
  - Crush forces up to 2,250kg*
  - Water immersion to 30m depth*
  - Extreme temperatures from -25°C to 150°C*
- Slim stylish design
- Capacities available: 16GB, 32GB & 64GB

*Based on 3rd party testing by SGS. Actual performance may vary.

Top 10 Benefits of SSD

1. **Faster loading, less time waiting**
   With no moving parts to spin up to speed, start-up is almost instant. Dramatically improving boot-up times.
2. **Faster transfer rates**
   File transfers are lightning quick and can be up to 1/3 faster than traditional Hard Disk Drives (HDD's).
3. **Find your files faster**
   File searches are up to 8x faster than traditional HDD's.
4. **Applications load faster**
   Spend less time waiting for your Adobe Photoshop and Powerpoint applications to open.
5. **Reduced power consumption**
   With no moving parts the SSD uses far less energy which in turn could make your laptop battery last up to 30 minutes longer!
6. **Halve your downtime**
   Normally, your computer or laptops routine maintenance will slow your system down. With an SSD, the time that virus scans and other background maintenance take, is cut by half!
7. **Multi-tasking**
   SSD's make multi-tasking faster. Edit your photos and answer your emails up to 3x faster than HDD's.
8. **Super fast video editing**
   With an SSD you can edit video clips over 30% faster than ever before!
9. **Superior durability**
   The SSD's lack of moving parts make it far more robust and reliable, with increased tolerance to heat, shock and vibration.
10. **Silent operation**
    SSD's are silent, just like a USB Flash Drive. No more distracting hums and whirrs as the drive spins up and down.

USB 3.1 External SSD

- USB 3.1 GEN 1 External Solid State Drive
- Stylish black design matching the Hard Drive range
- High speed data transfer
- USB-C™ cable

HELPING TO KEEP OUR CUSTOMERS' DATA SAFE AND SECURE

In today's world, the security of your confidential data is of the utmost importance. Imagine losing your personal files or highly confidential information from work and knowing that anyone can access the data because it was saved on a standard unencrypted storage device. To prevent this from happening, Verbatim has launched a range of products with security in mind.

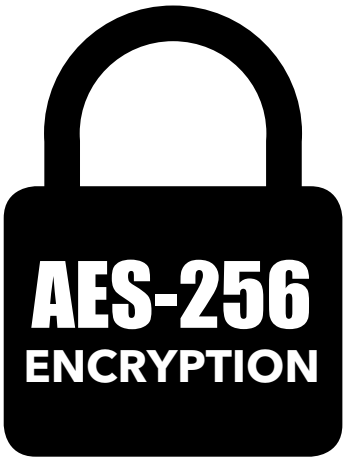
GDPR

General **D**ata **P**rotection **R**egulation will be in operation throughout the European Union from 25 May 2018. It applies to all companies processing and holding the personal data of data of subjects residing in the European Union. Organisations can be fined up to 4% of annual global turnover for breaching GDPR or €20 Million, which makes it even more important to guarantee sensitive data is kept safe!

WHAT IS AES 256-BIT ENCRYPTION?

AES stands for Advanced Encryption Standard. It is a symmetric block cypher chosen by the US government to protect classified information and is implemented in software and hardware throughout the world to encrypt sensitive data. AES has never been cracked and is safe against any brute force attacks.

256-bit encryption refers to the length of the encryption key used to encrypt a data stream or file. A hacker or cracker will require 2^{256} different combinations to break a 256-bit encrypted message, which is virtually impossible to be broken by even the fastest computers.



SECURE BAGS

A range of business bags which include a special RFID secure pocket to prevent identity fraud and electronic pick pocketing. The pocket uses a special material with integrated metallic layers that prevent thieves from electronically scanning and stealing the information from the microchips embedded in your credit/bank cards and passports.

SECURE SSD AND HDD

Verbatim's Store'n'Go Secure HDD and SSD Drives encrypt 100% of the data on the drive with AES 256-bit hardware encryption. With a keypad for PIN code access, all the data on the drives will be erased after multiple failed entry attempts.

SECURE PRO USB DRIVE

Like the Secure HDD and SSDs, Verbatim's Secure PRO USB drive uses AES 256-bit hardware encryption and has mandatory 100% drive encryption, making it FIPS-197 and GDPR compliant. No admin rights are required on the host system and it also erases data after multiple failed entry attempts.

OPTICAL MEDIA AND DRIVES

Blu-ray, DVD, CD media is the best solution for long term storage (up to 1000 years). It is the ultimate company protection from hacking/ malware as the files are saved on discs not directly connected to the company computer system. Best used with Verbatim's external DVD and Blu-ray Writers which include Nero Burn&Archive software free.

SECURITY FOR THE FUTURE

Verbatim is committed to helping our customers keep their data safe and secure – and supporting businesses with the products to adhere with GDPR.

HOW SECURE IS YOUR DATA?

HARD DRIVES

Verbatim hard drives feature Nero Backup software that allows full system backup and restore functions. Each USB 3.0 drive also includes Green Button Software, saving power when the drive is not in use as well as the Formatter Software that allows users to easily change the format of the drive from HFS+ to NTFS or FAT32, based on their own requirements. USB Rec&Play** allows your drive to act as a video recorder via USB, recording, playing back and even pausing live TV.

PORTABLE HDD

Secure Portable HDD with Keypad Access

watch video

- AES 256-bit Hardware Encryption
- Built-in keypad for passcode input (5 to 12 digits)
- Can be used with TVs (feature not possible with regular encrypted HDDs)
- USB 3.1 GEN 1 with USB-C™ connection (plus USB 3.0 adapter)
- LED power / encryption status indicators
- Does not store password in the computer or the system's volatile memory, therfore far more secure than software encryption

USB RECOPLAY

USB Recording enables you to record programmes to an external storage device directly connected to your TV via USB. Your external HDD basically acts as a videorecorder. You can also use it to pause live TV.
With USB Recording, your external USB hard drive becomes the replacement of your HDD/DVD recorder or even your VHS video recorders.
Scan the QR code for more information and instructions on how to set up USB recording for your TV.

** Windows operating systems only*
*** TVs in some countries may not have this feature*

DESKTOP HDD

Store 'n' Save USB 3.0

- USB 3.0 SuperSpeed data transfer
- Stylish black design that can be laid flat or on its side
- Store thousands of digital photos, videos, MP3s
- Software: Nero Backup*, Green Button, Hard Drive Eraser, Hard Drive Info*, Hard Drive Formatter
- USB Rec & Play**

HARD DRIVE

ACCESSORIES

From computers to notebooks, tablets to smartphones, Verbatim offers an extensive line of innovative, reliable and affordable accessories. Our broad range includes mice, headphones, chargers, cables and bags – all designed to enhance the experience of your device – at work or play.

POWER PACKS

In today's digital landscape, we rely on our smartphones. Everything from email, sat nav, internet access, social media and of course, making telephone calls can be done with one device.

So when the battery power is draining and you need your smartphone, what do you do? Panic!

This is where you need a portable power pack as backup. Plug it into your phone (or tablet) and it will charge it right back up so you can continue to use it, wherever you may be in the world. Panic averted.

Pocket Power Packs

- Fits easily into a pocket or bag, ideal for travelling
- Charges iPhones, iPods, Smartphones and more
- Connect directly to a smartphone via the integrated micro USB cable (iPhone cable needed to connect to an iPhone)
- Recharge power pack via PC USB port or mains

PART NO	DESCRIPTION
49946	Pocket Power Pack - 10,400mAh
49947	Pocket Power Pack - 13,000mAh
49948	Pocket Power Pack - 5,200mAh including Torch

Dual USB Portable Power Pack

- Dual USB Ports
- Charge a wide range of devices including iPads, tablets, iPhones, micro USB charged smartphones, eReaders and more
- Ultimate high capacity lithium-ion battery
- Lightweight, slim design
- LED indicators display the power status of the power pack

PART NO	DESCRIPTION
49952	Dual USB Portable Power Pack - 10,400mAh
49956	Dual USB Portable Power Pack - 13,600mAh

Premium Alkaline Batteries

- Reliable and long lasting alkaline batteries
- Up to 4 times more powerful than zinc carbon batteries

OTHER PRODUCT CATEGORIES

3D PRINTING

Verbatim provides top grade 3D printing filament, manufactured to very tight tolerances, made from the highest quality materials to ensure consistent feeding and stable prints. In addition to a range of PLA and ABS filaments, Verbatim also sells special filaments which have been exclusively developed by the Mitsubishi Chemical Holdings Group.

BVOH

- Butenediol Vinyl Alcohol Co-polymer (BVOH).
- Water dissolvable support material.
- Main applications: Support material for filaments, printing project with overhangs or complex objects.

PET

- High performance Polyethylene Terephthalate (PET).
- Food package grade pellets used.
- Main applications: Concept modelling for mechanics, medical, food containers, transparent objects.

PP

- High performance Polyethylene (PP).
- One of the most commonly used plastics in industry.
- Main applications: Technical products, automotive, mechanical engineering, prototypes, toys.

ABS

- High performance Acrylonitrile Butadiene Styrene (ABS).
- Highly durable filament with good heat resistance and a smooth finish.
- Main applications: Concept modelling for building, electrical, automotive industry etc. Non-critical parts such as enclosures.

PLA

- High performance Polyactic Acid (PLA).
- Partly degradable bio-polymer filament derived from plants. Easy to print.
- Main applications: Concept modelling for food packaging, transport containers, medical/hygienic products, housings. Education.

PRIMALLOY

- High performance Thermoplastic Polyester Elastomer (TPE).
- Flexible filament of the highest quality developed by Mitsubishi Chemical.
- Main applications: Flexible items such as insoles for shoes, hoses, bracelets, insulation, balls, wheels etc.

LED

Verbatim LEDs utilize unique technology developed by the Mitsubishi Chemical Group, including innovative optics, patented thermal management and knowledge of key materials to create high quality lighting solutions. The result is a wide range of high quality LED lamps and an expanding portfolio of LED luminaires for daily use. Verbatim products are designed to offer a high level of visual comfort, exceptional long term reliability and serve a broad range of applications. See www.verbatimlighting.com for more information.

LUMINAIRES

Verbatim LED luminaires are suitable for a broad range of professional lighting applications including hotels and restaurants, offices, retail stores and schools. Ideal for new lighting installations or upgrade projects, Verbatim's attractive luminaires offer fast and easy fitting with compact housing dimensions, excellent visual comfort, high efficacy and long lifetime.

PERFORMANCE LAMPS

Verbatim's LED performance lamps provide a direct replacement for current incandescent and halogen lamps. They offer outstanding light performance for a wide range of applications, significantly reducing energy and maintenance costs. These LED lamps are deisgned for the professional installer with a wide range of beam angles, long lifetime and colour temperatures to suit all applications.

BACKING-UP AND ARCHIVING

Regular back-ups protect against both accidental or malicious data loss – anything from hardware faults and viruses to human error or theft - as they can be used to restore original data files.

Choosing the right media and back-up procedure depends on many elements:

- The amount of data being saved
- The perceived value of the data
- The levels of accepted risk
- The length of time you need to keep the data for

3-2-1 BACKUP RULE

In addition to your primary data you should also have at least two more backups, which will help significantly reduce the risk of losing data. These could be physical and / or cloud solutions.

It is best practice to keep copies of your data on at least two different storage types, such as internal disk drives AND removable storage media (tapes, external hard drives, USB drives, SD-cards, CD's, DVDs).

It's obvious really; but it's not a good idea to keep your external storage device in the same room as your production storage.

If there is a fire, flood or burglary - you would lose all of your data.

BEST PROTECTION AGAINST ATTACK

ARCHIVE YOUR DATA

To be completely protected, a user or organisation needs to have data backed up and archived offline.

Any device that is attached to an attacked system or network is vulnerable. If your back up HDD is plugged into your laptop when a piece of ransomware software is installed, it will also be encrypted. Having the most important data archived to optical media can eliminate this risk.

QUALITY CONTROL

Verbatim and Mitsubishi's demanding quality control during the manufacturing process guarantees first-class products. The company delivers products and services that exceed customer expectations by leveraging its technology leadership, marketing expertise, and state-of-the-art distribution capabilities.

GLOBAL NETWORK DISTRIBUTION

Our operation is truly worldwide with offices, R&D, manufacturing and warehousing facilities spanning the globe. In EMEA, our sales and marketing offices are located in or close to the key cities of London, Frankfurt, Milan, Paris and Amsterdam.

EMEA WAREHOUSING AND OPERATION

In Europe, we operate out of our state-of-the-art central warehouse in Osnabruck, Germany, which has excellent rail, road, river and sea access.

FREE OF CHARGE HOTLINE SERVICE SUPPORT

To maintain and deliver our promise of guaranteed customer satisfaction, we offer free of charge hotline service support.
